## \* Notes

(1) Changes in significant subsidiaries during the period (changes in specified subsidiaries resulting in the change in scope of consolidation): Yes

Newly included: 3 companies (Company name) SANIX INCORPORATED, SANIX Resource Development Group, SANIX Homebuild Services, Inc.

1 companies (Company name) Shanri (Jiashan) Energy Technology Co., Ltd Excluded:

- (2) Changes in accounting policies, changes in accounting estimates, and restatement
  - Changes in accounting policies due to revisions to accounting standards and other regulations: (i) None
  - (ii) Changes in accounting policies due to other reasons: None
  - (iii) Changes in accounting estimates: None
  - (iv) Restatement: None

(3) Number of issued shares (common shares)

(i) Total number of issued shares at the end of the period (including treasury shares)

As of March 31,2025	48,919,396 shares
As of March 31,2024	48,919,396 shares

(ii) Number of treasury shares at the end of the period

As of March 31,2025	1,115,481 shares
As of March 31,2024	1,115,213 shares

(iii) Average number of shares outstanding during the period

Fiscal year ended March 31,2025	47,804,075 shares
Fiscal year ended March 31,2024	47,804,343 shares

(Percentages indicate year-on-year changes.)

### 1. Summary of Business Results

### (1) Overview of Business Results for the Current Fiscal Year

During the current consolidated fiscal year, the Japanese economy showed signs of a gradual recovery due to a recovery in personal consumption accompanying the normalization of social activities and rising inbound demand. However, uncertainty remained due to the unstable international situation, rising prices of raw materials and energy due to the weak yen, as well as the continuing rise in prices of commodities.

In such social conditions, our group has been working to create a sustainable society by promoting solutions to social issues through our business in the areas of housing, energy, and resource recycling, in accordance with our corporate philosophy, "Clean and comfortable environment for the next generation".

As for net sales, the Environmental Resources Development Division posted an increase (up 3.8% year-on-year) due to steady plastic fuel sales, while power plant sales declined (down 30.5% year-on-year) due to the lower unit price of power sales contracts for the current fiscal year. As a result, overall group sales were 45,352 million yen (down 3.8% from the previous year).

As for profits, the Environmental Resources Development business segment saw a decline in profits due to a significant decrease in the unit price of power sales contracts for power generation sales. As a result, the overall group posted operating income of 2,227 million yen (down 40.5% from the previous year), ordinary income of 1,950 million yen (down 43.7% from the previous year), and net income attributable to owners of the parent of 1,483 million yen (down 45.0% from the previous year).

Results for each segment for the current consolidated fiscal year are as follows.

### <Residential Environment Area>

### HS Business Division

The HS Business Division has strengthened its sales policy emphasizing the development of new customers since the previous fiscal year and has promoted efforts to expand its customer base. As a result, net sales amounted to 11,787 million yen (down 0.6% year-on-year). Although "Others," including home repair work, increased 24.2% year-on-year due to partial revision of selling prices, "foundation repair and house reinforcement work" decreased 13.3% year-on-year and "termite control work" decreased 8.9% year-on-year.

Operating income was 1,761 million yen (up 2.6% from the previous year) due to the revision of some selling prices and reduction of fixed costs such as personnel expenses.

### ES Business Division

In the ES Business Division, the Company has been working to strengthen relationships with owners of buildings and condominiums, as well as management companies and other business partners. However, due in part to a decrease in referrals from business partners, sales of the mainstay "installation of anti-corrosion equipment (product name: Doleman Shock)" declined 12.2% year-on-year, and sales of "building waterproofing painting and repair work" declined 17.2% year-on-year, resulting in sales of 2,571 million yen (down 4.8% from the previous year).

Despite the year-on-year decline in sales, operating income increased 53.1% to 103 million yen due to the reallocation of personnel and other factors.

### SE Business Division

The SE business division focused on sales of solar power generation systems and other products, specializing in detached houses. As a result, net sales amounted to 1,198 million yen (down 5.4% year-on-year).

Operating loss amounted to 41 million yen (operating loss of 59 million yen in the previous year) due to the yearon-year decrease in sales.

## <Energy area>

### PV Business Division

The PV Business Division focused on sales and installation of self-consumption solar power generation systems, etc. for companies and corporations, proposals of PPA projects to municipalities, sales of land-based solar power plants, equipment replacement and maintenance of existing solar power generation systems. During the period under review, sales amounted to 9,372 million yen (down 5.3% year-on-year) due to the delay in grid connection with electric power companies and the longer order-to-construction period resulting from larger and more sophisticated projects, which caused a delay in the timing of sales booking.

Operating income was 288 million yen (compared with operating income of 294 million yen in the previous fiscal year) due to improved profitability resulting from a review of costs and other factors, despite the decrease in sales.

#### PPS Business Division

In the PPS Business Division, the Company prioritized securing profitability and downsized its business in order to reduce the risk of price fluctuations in power procurement, affected by soaring prices in the wholesale electricity trading market (JEPX) in the winter of FY2020. As a result, net sales increased 3.8% year on year to 2,697 million yen.

Operating income increased 68.3% year-on-year to 169 million yen due to increased sales and improved profitability.

#### <Resource Circulation Area>

#### Environmental Resource Development Business Unit

In the Environmental Resource Development Business Unit, "plastic fuel" increased 3.8% year-on-year, "liquid waste treatment" increased 5.5% year-on-year, and "landfill disposal" increased 16.2% year-on-year. Nonetheless regarding "power plant sales," the Tomakomai Power Plant was affected by a significant drop in the market price of electricity, and although the plant switched to selling electricity mainly through retail sales, which have higher unit prices than wholesale sales of electricity, it did not reach the level of the contracted unit price of electricity sales of the previous fiscal year. In addition, periodic repairs at the Tomakomai Power Plant, which were conducted in March and April in the previous fiscal year, were conducted in April and May in the current fiscal year, resulting in a 30.5% year-on-year decrease in the number of operating days compared to the previous fiscal year. As a result, net sales were 17,836 million yen (down 5.6% year-on-year).

Operating income was 2,635 million yen (down 44.2% from the previous year) due to lower sales at the Tomakomai Power Station and the impact of repair costs incurred in connection with periodic repairs.

## (2) Overview of Financial Position for the current fiscal year

#### Assets, Liabilities and Net Assets

Total assets at the end of the current fiscal year were 36,655 million yen, a decrease of 310 million yen from the end of the previous fiscal year. Total liabilities amounted to 26,484 million yen, down 1,568 million yen from the end of the previous fiscal year. Total net assets amounted to 10,170 million yen, up 1,258 million yen from the end of the previous fiscal year. As a result, the equity ratio was 27.7%.

#### (Assets)

Current assets decreased 2,337 million yen to 13,873 million yen (down 14.4% from the previous period). The main factors were a 1,580 million yen decrease in cash and deposits and a 514 million yen decrease in accounts receivable.

Noncurrent assets increased 2,027 million yen to 22,781 million yen (up 9.8% from the previous period). The main factors were a 1,254 million yen increase in machinery, equipment and vehicles (net) and a 629 million yen increase in construction in progress.

### (Liabilities)

Current liabilities decreased 1,099 million yen from the end of the previous fiscal year to 16,910 million yen (down 6.1% from the previous period). The main factors were increases of 627 million yen in short-term loans payable and 33 million yen in current portion of long-term loans payable and decreases of 390 million yen in deposits received and 316 million yen in income taxes payable.

Noncurrent liabilities decreased 468 million yen from the end of the previous fiscal year to 9,574 million yen (down 4.7% from the previous period). The main factors were a decrease of 893 million yen in long-term loans payable and a decrease of 300 million yen in bonds payable.

## (Net Assets)

Total net assets increased 1,258 million yen from the end of the previous fiscal year to 10,170 million yen (up 14.1% year-on-year). The main factor was the net income attributable to parent company shareholders of 1,483 million yen.

### (3) Overview of cash flows for the current fiscal year

Cash and cash equivalents at the end of the current fiscal year decreased by 1,582 million yen from the end of the previous fiscal year to 4,686 million yen at the end of the current fiscal year.

The status of each cash flow and their factors during the current consolidated fiscal year are as follows.

### (Cash Flows from Operating Activities)

Net cash provided by operating activities totaled 2,648 million yen (4,821 million yen in the previous year). The main factors were income before income taxes and minority interests of 1,950 million yen and depreciation and amortization of 1,701 million yen as non-cash expense items.

#### (Cash Flows from Investing Activities)

Net cash used in investing activities totaled 3,575 million yen (1,800 million yen in the previous year). The main factor was 3,591 million yen used for the purchase of property, plant and equipment.

### (Cash flows from financing activities)

Net cash used in financing activities amounted to 666 million yen (678 million yen was used in the previous year). This was mainly due to proceeds from sale and installment backs of 1,273 million yen and a net increase in short-term loans payable of 627 million yen, which were offset by expenditures of 1,420 million yen for repayment of long-term loans payable and 943 million yen for repayment of installment obligations.

	FYE March 2021	FYE March 2022	FYE March 2023	FYE March 2024	FYE March 2025		
Equity Ratio	24.5%	13.5%	18.0%	24.1%	27.7%		
Equity ratio based on market value	47.5%	35.5%	40.9%	44.1%	31.9%		
Cash flow to interest- bearing debt ratio	4.16	-	2.46	2.43	4.14		
Interest Coverage Ratio	13.02	-	16.88	19.29	9.87		

#### (Reference) Cash flow indicators

(Note) Equity ratio: Equity/Total assets

Equity ratio based on market value: Market capitalization/Total assets

Debt to cash flow ratio: Interest-bearing debt/Operating cash flow

Interest coverage ratio: Operating cash flow/Interest expense

1.All indicators are calculated based on consolidated financial figures.

2.Market capitalization is calculated by multiplying the closing stock price at the end of the fiscal year by the total number of shares issued and outstanding at the end of the fiscal year.

3.Operating cash flow is the cash flow from operating activities shown in the consolidated statements of cash flows. Interest-bearing debt includes all liabilities on the consolidated balance sheets for which interest is paid. Interest payments are based on the amount of interest paid in the consolidated statements of cash flows.

#### (4) Outlook for the future

Based on our corporate philosophy of "Clean and comfortable environment for the next generation," our group will continue to work toward the creation of a sustainable society through new innovations in the areas of housing environment, resource recycling, and energy, utilizing our past business experience.

As announced in the "Notice of Transition to Holding Company Structure and Change of Trade Name" released on May 15, 2024, we have decided to transition to a holding company structure in April 2025, as we believe this is the best way to respond quickly to any changes in the business environment and to achieve sustainable growth. The holding company will specialize in group management functions to formulate group strategies and optimize the allocation of management resources, while the operating companies will focus on their respective businesses and aim to enhance the corporate value of the Group by conducting flexible and speedy business development in response to changes in the business environment and business characteristics.

Business strategies by segment are as follows.

### <Residential Environment Area>

#### **HSE Business Division**

The HSE Business Division will strengthen its business platform by further expanding its community-based new business development and ongoing follow-up with existing customers.

In addition, employment and other measures will be taken to increase the number of employees and open new branches aggressively to expand the client portfolio. Furthermore, we will respond to diverse needs related to the residential environment, as the energy-saving market is expected to accelerate due to improved insulation performance of houses (windows, insulation materials, etc.). In addition, the "installation of solar power generation equipment for detached houses," which was previously conducted as a stand-alone SE business, will be integrated with the HS business and re-positioned as "maintenance and renovation of detached houses.

### **ES Business Division**

Sales channels for maintenance measures for water supply and drainage facilities and maintenance of buildings and condominiums for the main product, "Installation of anti-corrosion equipment (product name: Doleman Shock)," will be expanded by establishing partnerships with management companies, customer introductions through close follow-ups with existing partners, and creating more opportunities for business negotiations with real estate owners. In addition, pest control and hygiene management services such as hygiene management support in accordance with HACCP (Hygiene Administration Control Method) for businesses that handle food products will also be promoted.

#### <Energy Area>

#### **PV Business Division**

In solar power generation systems for businesses and corporations, we have been working to shift our sales focus from the FIT system to "self-consumption" solar power generation systems. In addition to expanding sales channels for "self-consumption" solar power generation systems, which can help companies become carbon neutral and reduce electricity costs, the Company will strengthen its system for equipment replacement and after-sales maintenance at customers' solar power plants. Furthermore, productivity and efficiency will be improved, and cost reduction of materials and components will be promoted.

#### <Resource Recycling Area>

### Environmental Resources Development Business Division

Regarding the conversion of waste plastic into fuel, we have been improving the quality of fuel and the efficiency of plant operations. With respect to the conversion of waste plastics into fuel, improvement of fuel quality and more efficient plant operations have been promoted. In addition, efforts will be made to develop "material recycling," in which waste plastics that are suitable for use as plastic raw materials are sorted in the sorting process, processed in cooperation with partner companies, and reused as plastic raw materials. Furthermore, by promoting sales of a centralized waste management system for waste generators, collection and transportation companies, etc., as well as waste treatment businesses, support for complicated tasks such as contracts, management forms (manifest slips), and performance reports to local governments will be made possible.

Moreover, the system will enable the calculation of Scope 3 emissions related to waste, which is necessary for sustainability reporting, and will lead to continuous transactions.

In the area of liquid waste treatment, production of "Recycled Oil Bio," an alternative fuel to heavy oil derived from waste, and promotion of the conversion of sludge generated after liquid waste treatment into recycled fuel will contribute to the realization of a carbon-neutral society, as well as to the reduction and recycling of both industrial waste and resources, thereby contributing to a recycling-oriented society.

In addition, the Group aims to commercialize the recycling and processing of solar cell panels, as a large amount of used solar cell panels are expected to be generated in the 2030s with the expiration of the solar FIT purchase period. Applying the knowledge of solar cell panels that we have accumulated so far and our strength in having a nationwide industrial waste treatment network, we will proceed with the verification of recycling technology for solar cell panels.

#### PPS Business Division

The combination of soaring prices in the wholesale power trading market (JEPX) and global energy prices made it difficult to ensure the profitability of the electricity retail business, and we have liquidated unprofitable contracts and downsized the business. However, in addition to promoting the sale of electricity by effectively utilizing the added value of the Tomakomai Power Plant's non-fossil value electricity, we will continue our electricity supply and demand management operations with an eye to energy management, including in-house consumption in solar power generation system sales and commercialization of renewable energy introduction models such as PPA.

### Forecast of Consolidated Business Results for the Fiscal Year Ending March 31, 2026

For the fiscal year ending March 31, 2026, we forecast consolidated net sales of 46,791 million yen (up 3.2% year-on-year), operating income of 2,803 million yen (up 25.9%), ordinary income of 2,434 million yen (up 24.8%), and net income attributable to shareholders of the parent company is projected at 1,775 million yen (up 19.7% year-on-year).

		(Unit : million yen)
Consolidated Forecast	Fiscal year ending Mar. 2026	Fiscal year ending Mar. 2025 (actual results for the current fiscal year)
Net Sales	46,791	45,352
Operating Income	2,803	2,227
Ordinary Income	2,434	1,950
Net Income Attributable to Owners of the Parent	1,775	1,483

The above forecasts are based on information available as of the date of publication of this document, and actual results may differ from these forecasts due to various factors.

## 2. Accounting Standard Selection Policy

The Group has decided to adopt Japanese GAAP for the time being. The Group intends to adopt International Financial Reporting Standards (IFRS) as appropriate, taking into consideration various circumstances in Japan and overseas.

(5) Notes to the Consolidated Financial Statements (Notes to the Going Concern Assumption) Not applicable.

(Segment information, etc.)

[Segment information]

### 1. Overview of reportable segments

The Group's reportable segments are components of the Group for which separate financial information is available and which are subject to regular review by the Board of Directors in order to determine the allocation of management resources and evaluate their performance.

#### **HS Business Division**

Provides termite control installation, foundation repair and house reinforcement work, underfloor and ceiling ventilation system installation, renovation work, etc., for general households (detached houses).

#### **ES Business Division**

Maintenance and preservation of building water supply and drainage systems for buildings and condominiums, pest control construction, etc.

#### SE Business Division

Sells and installs photovoltaic power generation systems and storage batteries for detached houses.

### **PV Business Division**

Installation and maintenance of photovoltaic power generation systems, etc., and wholesale sales of photovoltaic power generation system equipment, etc., for businesses and corporations.

### **PPS Business Division**

Retail sales of electric power to general households and corporations.

#### Environmental Resource Development Business Division

Processes waste plastics collected as industrial waste by the Company and sells them as plastic fuel to consolidated subsidiary Sanix Energy Co. Sanix Energy uses the plastic fuel purchased from the Company and consolidated subsidiary Hokkaido Sanix Kankyo Co., Ltd. to generate electricity, and the incinerated ash generated by Sanix Energy is finally disposed of by consolidated subsidiary C&R Co. Also, consolidated subsidiary SE Wings Co., Ltd. purchases electricity from Sanix Energy Co., Ltd. and sells it to electricity suppliers, and consolidated subsidiary Sanix Solution Co.

Furthermore, various types of wastewaters, including organic wastewater discharged from food service and food factories and industrial wastewater discharged from other factories, are treated to produce raw materials for compost and cement and recycled fuels.

2. Method of calculating sales, profit or loss, assets, liabilities, and other items by reportable segment

The accounting method for reported business segments is the same as that described in "Basis of Presenting Consolidated Financial Statements".

Profits of reportable segments are based on operating income.

Intersegment sales and transfers are determined based on prevailing market prices.

3. Information on sales, income or loss, assets, liabilities and other items by reportable segment

(1) Previous fiscal year (April 1, 2023 to March 31, 2024)

								(Uni	t : million yen)
